A Windows utility that provides a list with fonts installed on your PC The application detects all fonts installed on your system A preview is displayed for each font which can be modified in terms of size, font, foreground/background color, italic, bold, and strikethrough You can create and maintain a list of favorite fonts to compare CPS Font Viewer License: Free CPS Font Viewer Screenshots: "While I was looking for another utility to display fonts of my office suite and Adobe Acrobat I come across with this nice solution, as always after a long search! CPS Font Viewer is a fast and easy tool. You can use it to view the fonts of a Word file, compare fonts, export a list of installed fonts, and modify the displayed text. On a Windows 8 tablet it works flawlessly, on a Windows 7 machine it was a little bit slower than on the Windows 8 PC. Even the interface is very easy to learn. The sample text is nice but you can replace it by your own. I only need that it shows a bit more, for example the number of fonts detected on my system. It showed only 10-20 fonts but my computer has over 100 fonts installed. You can check out which fonts are most used in your favorite programs with this tool. No option to enter additional information is available because the tool is very basic. I would suggest the program to everybody who needs to check out fonts in his office suite and Adobe Acrobat. A must have program for those who like to be amused." I found a good utility for installing fonts on Windows 7 CPS Font Viewer. Enhance your Windows interface with a small utility to view installed fonts and compare them for free. Get more information via the help button. Description: CPS Font Viewer is a lightweight Windows application whose purpose is to help you check out a list with all fonts installed on your computer. In order to work properly, the utility needs Microsoft.NET Framework 4.0 deployed on your system. Simple looks The tool reveals a clean feature lineup that displays all fonts directly in the main window. A help manual cannot be found in the package but you can set up the dedicated parameters on your own because they look easy to work with. CPS Font Viewer reveals a thumbnail preview with each font installed on your system using sample text, and shows the total number of fonts. What's more, you are allowed to modify the preset text message. Configuration settings CPS Font Viewer offers you the possibility to alter the text that is revealed in the main window for each font in terms of size, foreground/background color, as well as italic, bold and strikethrough mode. What's more, you can create a list with favorite fonts and make a comparison between two user-defined fonts to view how they look like placed side-by-side. On the downside, in order to close the configuration panel, you need to close the main window and terminate the program, and this represents a great inconvenience. Tests have shown that CPS Font Viewer loads the installed fonts quickly and without errors. It remains light on system resources so the overall performance of the computer is not hampered. Final words All in all, CPS Font Viewer comes packed with a straightforward suite of features for helping you view all installed fonts and check out sample text displayed in different fonts. The intuitive design makes it suitable for rookies and professionals alike.
