Ciiva Crack [Win/Mac]

• It provides you with real-time price and availability information with minimum effort. • It generates bills of materials, including custom labels for component selection. • It provides you with a component analysis, which enables you to view the components used in a specific project, compare multiple entries and export the results to Excel. • The product page is embedded in the parent product, enabling you to access the description and history of the product. • It enables you to trace changes in a project, retrieve the list of changes, export the results to CSV, CSVX or Excel. • It allows you to create new projects and components for a certain period of time. You can view all the projects in the system. • You can upload and download documents for multiple locations. • The application provides you with a component availability and real-time pricing, which is updated with minimum effort. • It can be used on multiple company locations. Ciiva Requirements: • It requires Microsoft Windows Server 2008 R2 or later. • It requires a database of at least 3GB. • It requires Microsoft Internet Explorer 10 or later. • A database administrator account is required to be created on the server. • Minimum and maximum storage capacities depend on the options that you have chosen, so please refer to the options below. • The storage available for product listings depends on the number of products that you have. For more information please see our products page. • You can choose the price calculation method that you prefer. The default method is the weighted average, which is more accurate. This is based on the average cost of the components in the BOM. You can also choose to calculate the cost based on the total of the products. • You can define the amount of storage available for the document storage. The default value is 10MB. The maximum value is 50MB. • The default value for the number of items in the product is 10. You can also set this value for the total number of items in the BOM. • The default value for the minimum number of items in a product is 1. You can also set this value for the total number of items in the BOM. • The default value for the maximum number of items in a product is 100. You can also set this value for the total number of items in the BOM. • The default value for the range of dates for the creation of projects and component entries is 1 year. • The default
